

GOKUL P

Full Stack Developer (MERN)

Mobile: +91-9025649921 | Email: gokulprabakaran05@gmail.com

CAREER OBJECTIVE

Full Stack Developer (MERN) with 1+ year of hands-on experience in building responsive and user-friendly web applications. Seeking an opportunity to contribute my skills in React.js, Next.js, Node.js, TypeScript, and Tailwind CSS while continuously learning and growing in a collaborative development environment.

PROFESSIONAL SUMMARY

- Full Stack Developer with 1+ year of hands-on experience in designing, developing, and maintaining web applications.
- Strong experience in frontend development using HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Redux, React Hooks, and Tailwind CSS to build responsive and interactive user interfaces.
- Worked on frontend frameworks like Tailwind CSS and CSS Bootstrap for development of web applications.
- Experienced in working with MySQL, SQL, and MongoDB databases, including writing optimized queries and implementing CRUD operations.
- Hands-on exposure to data handling using Pandas (basic) and backend logic implementation.
- Skilled in using development tools such as Git, GitHub, Visual Studio Code, and PyCharm for version control and code management.
- Involved in debugging, testing, and improving application performance to ensure code quality and reliability.

QUALIFICATION

B.Com (Computer Application) – CPA College, 2022–2025

TECHNICAL SKILLS

Languages : Python, JavaScript, TypeScript

Frontend Technologies : HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Redux, React Hooks, Tailwind CSS

Backend Technologies : Node.js, Express.js, Django, Flask, REST API

Databases : MySQL, SQL, MongoDB

Libraries : Pandas

Tools : Git, GitHub, Visual Studio Code, PyCharm

Operating System : Windows, Linux

PROFESSIONAL EXPERIENCE

Current Company : Bizpole, Palakkad

Duration : March 15, 2026 to till date | Designation : Full Stack Developer

PROJECT 1 – BizpoleOne (Business Product)

Role: Full Stack Developer | Duration: Aug 2025 – Present

Tech Stack: React.js, Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB

Description: BizpoleOne is a comprehensive all-in-one business platform designed to streamline and manage multiple business operations within a single system. It serves as a complete ERP System covering modules such as finance, HR, inventory, and reporting.

Responsibilities:

- Developed and maintained multiple business modules using React.js, Next.js, TypeScript, and Tailwind CSS
- Built scalable and reusable UI components for ERP workflows including finance, HR, and inventory modules
- Designed and implemented RESTful APIs using Node.js and Express.js for business data operations
- Integrated MongoDB for centralized data storage and management across multiple business modules
- Implemented role-based access control and user management for different business user types
- Collaborated on architecture design for a scalable and modular all-in-one business platform

- Performed code reviews, debugging, and performance optimization across the platform
- Connected frontend with backend APIs using Axios and ensured smooth data flow across modules

PROJECT 2 – BizpoleBooks (Accounting Software)

Role: Full Stack Developer | Duration: Mar 2026 – Present (6 Months)

Tech Stack: TypeScript, Next.js, Node.js, Express.js, MongoDB

Description: BizpoleBooks is a dedicated accounting software product developed for businesses to manage their financial operations efficiently. The platform handles bookkeeping, invoicing, expense tracking, and financial reporting through a clean and intuitive interface, separate from the BizpoleOne ERP platform.

Responsibilities:

- Worked on bug fixes and feature updates across the BizpoleBooks accounting platform
- Developed and enhanced frontend modules using TypeScript and Next.js for accounting workflows
- Built and maintained backend APIs using Node.js and Express.js for financial data operations
- Identified, debugged, and resolved critical issues to improve platform stability and performance
- Collaborated with the team to implement new features based on business and client requirements
- Performed end-to-end testing and ensured smooth integration between frontend and backend modules

PROJECT 3 – Dynamic Form Management System

Role: Full Stack Developer

Tech Stack: React.js, Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB

Description: A web-based application that allows users to create, manage, and submit dynamic forms with configurable fields and validations. Supports drag-and-drop form builder with real-time preview and secure submission storage.

Responsibilities:

- Designed and developed a dynamic form builder using React.js, Next.js, TypeScript, and Tailwind CSS
- Implemented drag-and-drop functionality for configuring form fields and layouts
- Built reusable React components for various form field types (text, dropdown, checkbox, radio, date)
- Developed backend REST APIs using Node.js and Express.js for form creation and submission handling
- Integrated MongoDB for storing form schemas, configurations, and user submissions
- Implemented form validations on both frontend and backend
- Added user authentication and role-based access control for form management
- Connected frontend with backend APIs using Axios and performed end-to-end testing and debugging

Previous Company : NextBrain Technologies

Duration : Nov 2024 to March 10, 2026 | Designation : Full Stack Developer

PROJECT 4 – Hospital Management System

Role: Full Stack Developer

Tech Stack: React.js, Next.js, TypeScript, Tailwind CSS, Node.js, Express.js, MongoDB, MySQL

Description: A web-based application designed to manage the day-to-day operations of a hospital, handling patient records, doctor management, appointments, billing, and reports through a centralized platform.

Responsibilities:

- Designed and developed responsive user interfaces using React.js, Next.js, TypeScript, Tailwind CSS, HTML, and JavaScript
- Implemented reusable React components and state management with Redux
- Developed backend REST APIs using Node.js and Express.js
- Integrated MongoDB and MySQL database for storing patient, doctor, and appointment data
- Implemented CRUD operations for patients, doctors, and appointments
- Added user authentication and role-based access (Admin, Doctor, Receptionist)
- Connected frontend with backend APIs using Axios / Fetch
- Performed debugging, testing, and performance optimization

DECLARATION

I hereby declare that the above information is true and correct to the best of my knowledge.
